SKILLS

- Flutter & Dart
- **State Management:** Riverpod, GetX
- **Backend:** Supabase, Firebase
- **APIs:** REST API Integration
- **Architecture:** Clean Architecture, Feature First Architecture
- **Databases:** PostgreSQL, SQL

PROFESSIONAL SUMMARY

Flutter developer building cross-platform mobile applications with Firebase/Supabase backends, REST APIs, and state management solutions. Currently developing skills in clean architecture, dependency injection, and full-stack development through hands-on projects.

PROJECTS

FairShare – Expense Splitting App (Flutter, Supabase)

- Built a cross-platform expense management app using Flutter
- Implemented authentication using Supabase Auth
- Used Riverpod for state management and dependency injection
- Integrated real-time expense syncing using PostgreSQL
- Followed clean architecture for scalable codebase

Inventory Management System (Flutter, FastAPI, SQL)

- Flutter-based inventory management application with FastAPI and SQL backend
- Implemented authentication and inventory updates directly from SQL database
- Visualized inventory and sales data using charts and enabled CSV export
- Managed application state using Riverpod and implemented dark/light mode

E-commerce UI Project (Flutter, Riverpod)

- Built an e-commerce UI with multiple screens using Flutter
- Managed UI state and navigation using Riverpod

EDUCATION

Bachelor of Science in Software Engineering

Comsats University Lahore | 2024 - 2028

- CGPA: 3.5
